

To whom it may concern,

This is in response to HR 4026 (Petition that seeks to stop XM from providing XM Instant Traffic & Weather).

I find that in this day and age of record unemployment, threats of terrorism, rising fuel prices, that our House or Representatives would devote time to such a small, mindless project. If our HR would spend more time in trying to rectify the many problems at home, instead of trying to stifle my "freedom of choice", ie: my choice to purchase XM Satellite Radio, maybe the country would be in much better shape.

The way that I am viewing this bill, is that it is nothing more than another effort of big business to stifle to growth of a " new " mode of transmission.

Please tend to the " real " problems: unemployment, war, rising prices. These are the " real " problems in the USA, not another mode of entertainment.

Thank You,
